Profile

I am a self motivated, hardworking and creative individual, looking to take my first steps in the coding industry. When Covid-19 first hit, I decided to use my extra time to develop a new skill. I taught myself the basics of website development and soon realised my passion for this industry. Having completed a module in coding in my University Engineering course, I progressed my knowledge further by taking a range of courses from Udemy and Youtube. Using these skills, I have built a fully responsive website for a client and have created personal projects with technologies such as Javascript, Node JS and React.

In 2019 I travelled to Australia alone where I worked an eclectic range of jobs from fruit-selling to being a supervisor at a manual labour events company. Prior to travelling in 2019, I worked in the hospitality and delivery sector. All of these jobs have taught me important skills such as communication, time-management and teamwork; I am looking forward to transferring these skills into a developer job.

Technologies Learnt

HTML, CSS, Javascript, NodeJS, Express, MongoDB, React,, Bootstrap, MaterialUI and Git.

Education

The Web Developer Bootcamp, Udemy, June 2020.

Higher Education Certificate in Electrical and Electronic Engineering, Newcastle University, June 2018

A Levels, AAB, Mathematics, Chemistry and Physics.

AS Level, C, Economics.

GCSE's, 10 A*- B grades.

Employment History and Relevant Projects

The Storey Social: July 2020

- **NodeJS, Express, Bootstrap and Git.**
- A social media portfolio website intended to display my clients accomplishments. I worked collaboratively with the client to ensure the needs of the website were met.
- Provided a professional and fully responsive website on desktop, tablet and mobile with cross browser compatibility.

Pantry Sorter: May 2020

- **NodeJs, React, MongoDB, Express, Material UI and Git.**
- It has a fast and intuitive design that is easy for the everyday user.

Yelpcamp: June 2020

- **NodeJS, Express, MongoDB, Bootstrap and Git.**
- A project made in conjunction with a Udemy course that I have personalised.

Mcdonalds, Leeds: February 2020 - September 2020 (furloughed) / Llandudno Junction:

May 2018 - October 2018

- Used my excellent customer service and food preparation skills to serve customers at a high standard.

Crew Member, Harry The Hirer, Melbourne: September 2019 - December 2019 / Crew Member, GC

Events, Brisbane: May 2019 - June 2019

- Contributed to a team effort of building Marquees for major Australian sporting events.
- Was praised at being a quick learner with good communication skills so was regularly entrusted with supervisor duties such as being in charge of casual crew members and overseeing smaller projects.

Delivery Driver, Tesco, Llandudno Junction: October 2018 - January 2019

- Good time management skills ensuring timely deliveries.
- Using my interpersonal skills, I created great customer relations by helping to unpack shopping and solving any problems that arose.
