## Profile

I am a self motivated, hardworking and creative individual, looking to take my first steps in the coding industry. When Covid-19 first hit, I decided to use my extra time to develop a new skill. I taught myself to code and soon realised my passion for this industry. Already having a background in Engineering,  I took a range of courses from Udemy and Youtube to educate myself in this skill. Using what I learnt, I have built a fully responsive website for a client as well as have created other personal projects using languages such as  Javascript, Node JS and React.
In 2019 I travelled to Australia alone where I worked an eclectic range of jobs from fruit-selling to being a supervisor at a manual labour events company. Prior to travelling in 2019, I worked in the hospitality and delivery sector. All of these jobs have taught me important skills such as communication, time-management and teamwork; I am looking forward to transferring these skills into a coding job.

## Languages Learnt

HTML, CSS, Javascript, NodeJS, Express, MongoDB, ReactJS, etc…

## Education

*The Web Developer Bootcamp*, Udemy, June 2020.
Newcastle Uni.
A Levels, AAB, Mathematics, Chemistry and Physics.
AS Level, C, Economics.
GCSE's, 10 A*- B grades.

## Employment History and Relevant Projects

**The Storey Social: July 2020**
- A social media portfolio website intended to display my clients accomplishments. I worked collaboratively with the client to ensure the needs of the website were met.
- Ensured the website was fully responsive on desktop, tablet and mobile with cross browser compatibility.
- I used NodeJS and Express and included a contact form made using Nodemailer.

**Pantry Sorter: May 2020**
- A personal project made using React and MongoDB.
- It has a fast and intuitive design that is easy for the everyday user.

**Yelpcamp: June 2020**
- Yelpcamp is a project that was made in conjunction with the Udemy course. It began as a guided (?) code-a-long but in order to make it more exciting I personalised it by adding Google Maps and Geocode APIs as well as my own design.

**Mcdonalds, Leeds: February 2020 - September 2020 (furloughed) / Llandudno Junction: May 2018 - October 2018**
- Used my excellent customer service and food preparation skills to serve customers at a high standard.

**Crew Member, Harry The Hirer, Melbourne: September 2019 - December 2019 / Crew Member, GC Events, Brisbane: May 2019 - June 2019**
- Contributed to a team effort of building Marquees for events such as the Ipswich Races and Phillip Island Moto Grand Prix.
- Was praised at being a quick learner with good communication skills so was regularly entrusted with supervisor duties such as being in charge of casual crew members and overseeing smaller projects.

**Delivery Driver, Tesco, Llandudno Junction: October 2018 - January 2019**
- Good time management skills ensuring timely deliveries.
- Using my interpersonal skills, I created great customer relations by helping to unpack shopping and solving any problems that arose.
